

"I absolutely loved my Geology courses at Red Rocks. I retained so much. The instruction is engaging, never dull, and carefully explained. Only truly talented professors can transfer excitement to their students."

- Former RRCC Geology Student

GEOLOGY ROCKS!

AT RED ROCKS

Geology

is a great way to explore the amazing state and world we live in, while earning college credit.

We offer many transferable (GT) courses that meet the natural science requirement for AA, AS, AGS, and AAS degrees.

Our GT-SC1 lab courses include:

- Physical Geology (GEY 111)
- Historical Geology (GEY 112)
- Environmental Geology (GEY 135)
- Environmental Science (ENV 101)
- General Oceanography (NRE 251)

For GT-SC2 non-lab courses, we offer: Geology of National Parks (GEY 108) and Natural Disasters (ENV 110)

Each term, we also offer short-term weekend classes on specific geologic topics for 1, 2, or 3 credits. Examples include a 1-credit course on Rock & Mineral ID, a 2-credit course about Caves, and a 3-credit course on The Geology of Colorado.

Alumni of our program say:

"I often use what I learned from Red Rocks geology classes in the real world."

"I received a very well-rounded and in-depth introductory geological education at RRCC which helped me to succeed later in the upper-division geology classes I took."
