While designed with ski patrollers in mind so as to accommodate their summer work schedules and the time between those jobs and ski season, this section is open to anyone who wants to register. It will meet all the requirements/objectives of any of our EMT courses, but there will be a deeper dive into environmental emergencies, altitude emergencies, water related emergencies, etc. that people who work in the outdoor setting may be more likely to encounter. Also the skills will involve some evolutions that are more applicable to working on the hill, such as boot removal, dealing with winter clothing, alternative splinting methods, packaging, etc.

The didactic portion of the program will take place online 6/12 – 8/4. This is followed by a two-week skills session that will meet on campus Monday – Friday from 8 am to 5 pm on 8/7 – 8/18. The clinical phase of the program will take place in the fall semester with the expectation that students will schedule all their clinical rotations to be completed by mid-September.
